National Technical Reports Library

Easy Access to and Perpetual Availability of Federally-Funded Technical Reports

The National Technical Reports Library fills a recognised void in access to a large collection of historical and current government technical reports that exists in many academic, public, government, and corporate libraries. Through NTRL, NTIS now provides a more comprehensive offering that delivers high-quality government technical content in all subject areas directly and seamlessly to the user's desktop.

What you get:

A subscribing organisation’s students, faculty, staff and on-site library patrons may access the National Technical Reports Library for non-commercial use from Internet-connected organization-wide locations. Users at the subscribing organisation may access NTRL from remote locations and branch or satellite facility through the organisation’s server. Annual subscription pricing is based on full-time equivalent (FTE) enrolment or employees. The National Technical Information Service acquires, indexes, abstracts, and archives the largest collection of U.S. government-sponsored technical reports in existence. The NTRL offers access to these authenticated government technical reports to libraries and technical information users.

Subject coverage includes:

- Administration & Management
- Aeronautics & Aerodynamics
- Agriculture & Food
- Astronomy & Astrophysics Energy
- Atmospheric Sciences
- Behavior & Society
- Biomedical Technology & Human Factors Engineering
- Building Industry Technology
- Business & Economics
- Chemistry
