The perfect solution for business and cross-disciplinary data resource needs

- Need statistical data to support a research topic or assignment?
- Finding it difficult to pinpoint easy-to-use data on the web, and published reports too expensive?
- Need instant time series comparisons or trends analysis?
Popular internet search engines provide no means of isolating the contents of statistical tables from the surrounding text of documents. But why wade through unmanageable and irrelevant results to find the piece of data you need? **A better solution is available from ProQuest.**

ProQuest Statistical Insight and DataSets

ProQuest Statistical Collections offer highly-efficient searching across over 1 million indexed tables, more than 650 numeric datasets, and over 1 billion times series, for the latest data points and time series of 30, 50 or 100 years.

**ProQuest Statistical Insight** provides fast and easy access to statistical information produced by U.S. federal agencies and states, major intergovernmental and private organisations.

Through its abstracting and indexing at the table line item, it allows you to go directly to the data, table or publication you need.

**NEW!**

Previously, business researchers and students have had no means of doing a focused search for statistical content. But now, it's possible to search and isolate the statistical content of a report or article, without getting sidetracked by the findings or recommendations. In short, you can get to the data you need to support your research, quickly and efficiently, with...

**ProQuest Statistical Insight Business Edition**

*ProQuest Statistical Insight Business Edition* is mapped to ProQuest’s ABI/INFORM, to provide a total solution for business research needs. Together with *ProQuest Statistical DataSets*, it’s perfect for researching and developing:

- Business plans
- Market profiles
- SWOT analyses
- Sustainability analysis
- Same period year-on-year data comparisons

Data covers:

- Business profiles
- Consumer spending and purchasing patterns
- Demographic and population trends
- Economic indicators
- Employment
- Energy and resources
- Environment
- Finance
- Health and well-being
- Industry performance and outlook
- Logistics and freight
- Taxation
- Trade, tariffs, and balance of payments

Users can easily search and retrieve detailed statistics from authoritative, comprehensive and timely sources. They can leverage interactive data visualisation tools, customise charts or tables to their needs, and export to Excel or Powerpoint.
“Statistical Insight includes all kinds of statistical publications including those with prices, production, and consumption. At the University of Minnesota, Statistical Insight helps to fill a gap in the libraries’ collection of market research. Market research is very, very expensive and the University of Minnesota is unfortunately not able to purchase market research reports directly. However, Statistical Insight can identify sources of data from trade associations that can cover similar territory to market research. Thus, it helps us serve researchers that otherwise would have to look elsewhere for such data.”

Amy West, Data Librarian, University of Minnesota, ASSIST Quarterly, 2010

ProQuest Statistical DataSets searches and presents billions of data points within a single, easy-to-use interface. It provides a variety of data display and export options. Sources include...

- IMF
- The China Data Center
- Institute for Supply Management
- World Resources Institute
- Dow Jones
- Standard & Poors
- FTSE Group
- Shanghai Stock Exchange
- The World Bank
- The United Nations Economic Commission for Europe

...to name but a few.

Together with ProQuest Statistical Insight, these integrated solutions make data cross-searchable from over 500 different U.S. and international sources.

- Compare indicators across datasets
- Compare time periods
- Find news stories on trends
Also available...
